Overview of Project

Dismantling / reuse of copper pipes from Multi-level Parking area & washing through Acetone, Pressure test and purging of old copper pipelines for reuse on patients. Documents for the same must be submitted. Reinstallation of these copper pipelines after the said process is completed to be used for new CT MRI Medical Gas Pipeline Work.

The CT - MRI rooms require oxygen, vacuum, air & nitrous supply for patients. The copper pipelines must be connected from casualty OT area (lobby) to new CT MRI room. MRI room already has MR compatible outlet points for oxygen, vacuum, air & nitrous hence, outlet points are not required for the same. For CT scan oxygen, vacuum & nitrous outlets are required. The bidders are requested to kindly visit the site to get a complete overview of the project. All necessary spares like isolation valves, saddles, hanger bolts, copper T-piece & elbows, color required for this project are under bidder's scope of work. All copper pipelines required for the project should be taken from multi level parking area as suggested above. For any queries related to above project work kindly contact Biomedical Engineer - 9727740986 during office hours.

Price Bid
